

Daybreak South with Chris Walker

Aug. 12, 2021 - The Okanagan is now in Level 4 drought, Vaseux Creek is in Level 5, the highest level possible. What does Level 5 mean? "Adverse impacts are almost certain" and there is "high likelihood of significant irreversible harm to the aquatic ecosystem." We talked with CBC Kelowna's Daybreak South about the impacts being seen in the valley and what residents can do to help.
