

MAKE WATER WORK

Plant Collection

Created in partnership with Okanagan Xeriscape Association

PLANT TYPE CODES

- G** Grass
- S** Shrub
- ES** Evergreen Shrub
- T** Tree
- P** Perennial
- FS** Flowering Shrub
- ES-H** Evergreen Shrub Hedging
- FS** FireSmart

WATER NEEDS

- 0-3" (7.5cm) per year**
 - 4-7" (10-18cm) per year**
 - 8-11" (20-28cm) per year**
- * add a drop for full sun planting

LIGHT NEEDS

- S** Full Sun
- PS** Part Sun
- SH** Shade

DEER RESISTANCE

- Deer Resistant
- Deer Resistant, unless food is scarce.

COMMON NAME	SYLX NAME	LATIN NAME	TYPE	WATER NEEDS	SUNLIGHT	FIRE SMART	EDIBLE

PERENNIALS

Barrenwort		Epimedium (sp.)	P		PS/SH		
Bigroot Cranesbill		Geranium (sp.)	P		S/PS		
Blanket Flower	kc'unus	Gaillardia (sp.)	P		S		
Blue Flax		Linum perenne	P	*	S/PS		
Butterfly Gaura		Gaura lindheimeri	P		S		
Chives		Allium schoenoprasum	P		S		Edible
Cushion Spurge		Euphorbia polychroma	P	*	S/PS		
Dusseldorf Pride Thrift		Armeria maritima (var.)	P		S		
Firewitch Pinks		Dianthus (sp.)	P		S		Edible
Garlic Chives		Allium tuberosum	P		S		Edible
German Iris		Iris germanica	P		S		
Gloriosa Daisy		Rudbeckia hirta	P		S		
Hardy Ice Plant		Delosperma (sp.)	P		S		
Heartleaf Bergenia		Bergenia cordifolia	P		PS/SH		
Hen and Chicks		Sempervivum (sp.)	P		S/PS		

sp. = more than one species of the plant family is WaterWise || var. = more than one variety of the plant is WaterWise

Watering Tips

On average, the Okanagan gets about 11 inches (28 cm) of natural precipitation annually. The amount of additional water a plant will need in the growing season will be affected by the type of soil it is growing in and whether or not the soil has been covered by mulch (which helps retain moisture!).

The water needs indicated (1 or 2 drops) are for mulched, average, well-drained soil with good organic content and after the plants are established. Plants in sandy soils will need a bit more water, and plants in clay soils will do well with less than the suggested supplementation.

It is important to water deeply and less often so that water soaks into the soil and encourages deep root growth. A deep watering would be an application of one inch. (Measure how long that takes by putting out tuna cans within the area next time you water.) Any supplemental watering that is required is needed most in our dry summer months.

To attract pollinators, choose plants with different bloom times.

FireSmart Legend

Priority Zones

- Immediate Zone
0-1.5 m
- Intermediate Zone
1.5-10 m
- Extended Zone
10-30 m
- Extended & Beyond
21-30+ m
- Generally considered fire-resistant, however more research is required to determine which zone is appropriate for use.
